

LICENSING REVIEW REPORT – #1

Log of activities

Project	Repository	Licensing Review tool	Run by	Date	Result
Universal DID Resolver and Registrar	universal-resolver	REUSE linter tool	Lucas Lasota	10.06.2020	Not compliant with version 3.0 of the REUSE Specification

Summary of recommendations

	General Actions to Take	Explanation
1.	Please add the copyright and licensing information to each plain text file in your repository that do not currently have a comment header.	<p>As spotted on the scanning, there are files on the project do not have copyright and license displayed in a comment header. For those files without copyright and license information, we suggest following the REUSE specifications accordingly to the following rules:</p> <ol style="list-style-type: none"> 1. All files containing code that you and your contributors have written should contain the SPDX License Identifier of the license that you have chosen for the project. 2. All files containing code written from third parties should contain the SPDX License Identifier with the license under which the code was originally distributed and the copyright header from who wrote the code. <p>The following can be used as a template for a comment header:</p> <pre>/* * SPDX-FileCopyrightText: 2020 Jane Doe <jane@example.com> * * SPDX-License-Identifier: Apache-2.0 */</pre> <p>For more details, please see our REUSE tutorial here: https://reuse.software/tutorial/.</p>
2.	You may wish to place certain files that can be considered "insignificant" into the "public domain".	<p>You have some files in your project that are not particularly copyrightable, for example configuration files such as .gitignore. Intuitively, you may not want to license these files, but it would be best practice under our REUSE Initiative to have all your files clearly marked with copyright and licensing information.</p> <p>You can use the Creative Commons Zero v1.0 Universal license for these files, under the SPDX License Identifier CC0-1.0, which would effectively place them in the "public domain". The license text for the CC0-1.0 license would also have to be added to your LICENSES directory.</p>

REUSE latest report

Repository: **universal-resolver**

SUMMARY

- * Bad licenses:
- * Missing licenses:
- * Unused licenses:
- * Used licenses:
- * Read errors: 0
- * Files with copyright information: 0 / 85
- * Files with license information: 0 / 85

Unfortunately, your project is not compliant with version 3.0 of the REUSE Specification :-)
